Hubbard Glacier

Day 5

Scenic cruising at Hubbard Glacier

The largest tidewater glacier in North America, Hubbard Glacier measures 76 miles long and plunges 1,200 feet into the depths of the bay. Its immense beauty and phenomenal blue hues are enchanting, even from afar. But it's when your cruise ship draws closer that its towering surface really impresses, dwarfing even the uppermost deck on your ship at a whopping 40 stories high. There, with the snowcapped mountains serving as a glorious backdrop, you'll have a prime viewing spot from which to witness the glacier calving, as it often expels icebergs the size of 10-story buildings—imagine the splash!

The area around Hubbard Glacier is also renowned for its wildlife, where whales, harbor seals and otters swim, brown bears, moose and black-tailed deer roam ashore, and a wide variety of seabirds soar gracefully across the sky.

Not surprisingly, Glacier Bay National Park and its epic ice giants are part of a UNESCO World Heritage Site comprising Alaska's magnificent park system.

Take in the awe-inspiring scenery as you enjoy an unforgettable day of sailing through this dazzling park, where you'll glide along emerald waters and past calving icebergs, and can breathe in the crisp, fresh air to your heart's content.
